

Vibrant hits #12 in NM Business Week Rankings

Albuquerque, NM – April 8, 2011

Vibrant Corporation has been ranked #12 on New Mexico Business Weekly's list of Aerospace and Aviation companies. As rankings are tied to number of full time New Mexico employees, Vibrant, with 8 current and up to 3 planned positions, will continue to improve its standings. Founded in 2006 with only 2 employees, Vibrant has maintained steady growth by achieving main stream production use of PCRT at an increasing number of facilities. With the continued adoption of PCRT as an NDT inspection method, Vibrant sees growth continuing at an accelerated pace in the future.

About Vibrant

Vibrant Corporation has commercialized Process Compensated Resonance Testing (PCRT) for use in the aerospace and power generation industries. The PCRT technology, licensed from Magnaflux Quasar, is a revolutionary non-destructive testing technology that can determine if a component is structurally sound and fit for service. Vibrant has developed PCRT applications focused on the safety critical components found in the aerospace industry. These applications bring the power of PCRT to bear on new product quality control and in-service product degradation tracking. Vibrant is now performing testing services for several major aerospace manufacturers and Maintenance, Repair, and Overhaul (MRO) firms. www.vibrantndt.com
