

## **New Application Engineer Announced**

*Trevor Shaw to Apply Process Compensated Resonance Testing (PCRT) Technology to Aerospace and Power Generation*

### **Albuquerque, NM – January 4, 2010**

Vibrant Corporation announced today that Trevor Shaw has been hired as its newest Application Engineer. Mr. Shaw joins Vibrant Corporation with 10 years of aerospace experience with Pratt & Whitney and DeVore Aviation, bridging areas from Component Repair to Advanced Engine Studies.

Vibrant Director of Technology, Leanne Jauriqui, says “We are excited to be bringing Trevor on board with Vibrant. His multi-disciplinary experience brings us an engineer with an excellent skill set for expanding product applications for PCRT.”

Trevor holds a Bachelor’s Degree in Mechanical Engineering from Boston University.

### **About Vibrant**

Vibrant is a spin off of Mechtronic Solutions, Inc. that has commercialized Process Compensated Resonance Testing (PCRT) in the aerospace and power generation industries. The PCRT technology, licensed from Magnaflux Quasar, is a revolutionary non-destructive testing technology that can determine if a component is structurally sound and fit for service. Vibrant has developed PCRT applications focused on the safety critical components found in the aerospace industry. These applications bring the power of PCRT to bear on new product quality control and in-service product degradation tracking. Vibrant is now performing testing services for several major aerospace manufacturers and Maintenance, Repair, and Overhaul (MRO) firms. [www.vibrantndt.com](http://www.vibrantndt.com)
